

Cardiac Network, Inc. Announces First Sales of the Lifesaving HeartOne Club Monitoring System Nationally

SAN FRANCISCO, April 14, 2009 -- Cardiac Network, Inc. (Other OTC:CNWI.PK) announced today the first sales for the lifesaving HeartOne Club Monitoring System nationally, after successfully concluding its development and testing period. Members can join the HeartOne Club by going directly to its web site at www.heartoneclub.com. The HeartOne Club is owned by Cardiac Network and operated separately from Cardiac Network's clinically prescribed cardiac monitoring services.

The HeartOne Club is a revolutionary and lifesaving heart monitoring service that will allow patients to order HeartOne Club monitors directly from its web site. Until now heart monitors have generally been available only through prescriptions with long waiting times. The new HeartOne Club Monitoring System assures all who own a monitor that they will have access to the HeartOne Club's heart monitoring services and professional staff 24 hours a day, 7-days a week and every day of the year.

HeartOne Club provides a real-time option for evaluating cardiac related symptoms and in the event of a potential cardiac emergency. Statistics show that 65% of heart attack victims take too long to seek the required emergency treatment. This is mostly due to their uncertainty regarding whether symptoms are heart related or not. Time is critical as death rates double within two hours from experiencing the first symptoms of a heart attack. Those who quickly get to the Emergency Room, greatly increase their chances of survival and of preventing irreversible heart damage.

The following are HeartOne Club features:

- Members will be able to speak with a CCI Certified Technician, supervised by a board certified cardiologist and available 24/7 in case of an emergency.
- Member's emergency contact information and previous ECGs are securely stored in the HIPAA compliant HeartOne database for immediate access and individualized evaluation of his or her condition.
- Medical staff adheres to symptom evaluation protocol and quality assurance measures designed by Cardiac Network's Medical Advisory Board.
- In the event of an emergency, Cardiac Network's staff will stay on the line to help its members through the emergency procedures:
 - Immediately arranges for a local ambulance

- Notifies the member's regular physician and emergency contacts
- Transfers ECG and relevant information to the Emergency Room to expedite treatment and increase chances of survival

The monitors that work anywhere and transfer data through a telephone will be available as part of enrolling in a membership program. Members will pay a monthly monitoring fee that varies depending on the type of heart monitor and promotions in effect at the time of enrollment.

"With the HeartOne Club, anyone can afford peace of mind for themselves or family members that cardiac evaluation is immediately available should they experience symptoms associated with cardiac health problems," stated Mr. Michael Swartzburg, President and CEO of Cardiac Network Inc.

About Cardiovascular Disease

Cardiovascular disease and coronary heart disease are widespread, afflicting over 70 million people. Each year, about 1.1 million Americans suffer a heart attack. About 460,000 of those heart attacks are fatal.

About Cardiac Network, Inc.

Cardiac Network, Inc. is a medical technology company providing cardiac monitoring and diagnostic services to general practitioners and specialist physicians, for the investigation of patients with abnormal cardiac rhythm and function. The service uses unique transtelephonic (by telephone) cardiac recorders that monitor and provide diagnostic information to physicians and their patients.

Forward-Looking Statements

Except for historical information contained herein, the statements in this release are forward-looking and made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are inherently unreliable and actual results may differ materially. Examples of forward-looking statements in this news release include statements regarding Cardiac Network's anticipated economically competitive products and services. Factors which could cause actual results to differ materially from these forward-looking statements include such factors as fluctuations in demand for Cardiac Network's products, Cardiac Network's ability to maintain strategic business relationships, the impact of competitive products and pricing, growth in targeted markets and the adequacy of Cardiac Network's liquidity and financial strength to support its growth. Cardiac Network undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
