

Cardiac Network Welcomes Honored Cardiac Surgeon to its Advisory Board of Industry Experts

SAN FRANCISCO, June 26, 2009 -- Cardiac Network, Inc. (Other OTC:CNWI.PK) announced today the addition of an honored cardiac surgeon to the company's advisory board. Fardad Esmailian, MD, is from UCLA Medical Center and will be advising the Company on its clinical programs and value-added services for Cardiac Network's HeartOne Club.

Dr. Esmailian currently serves as a Clinical Professor of Surgery at UCLA Medical Center, Division of Cardiothoracic Surgery, and is a practicing Board Certified Cardiothoracic Surgeon. Dr. Esmailian obtained his M.D. degree from The George Washington University School of Medicine in Washington, DC, and did his Residency in Cardiothoracic Surgery at the University of California, Los Angeles. He was the Director of Cardiac Surgery at UCLA-Santa Monica Hospital, California, from July 1999 to July 2007, and Chief, Division of Cardiothoracic Surgery, at Wadsworth VA Medical Center in Los Angeles from July 1996 to July 1999. Dr. Esmailian has served on the Department of Surgery Finance Committee and Medical School Admissions Subcommittee at UCLA Medical Center. He has received research awards and featured in various publications in the areas of cardiac surgery and heart transplantation, and is often an invited speaker in conferences and media programs.

“Dr. Esmailian will be a tremendous complement to the advisory board that contains experts from the financial, regulatory and medical fields. This advisory group will be critical in guiding our company through its rapid growth,” said Michael Swartzburg, President & CEO of Cardiac Network, Inc.

Cardiac Network will continue to reach out to the industry advisors to provide ongoing assistance with its expanding medical and technology services platform.

About Cardiac Network, Inc.

Cardiac Network, Inc. is a medical technology company providing cardiac monitoring and diagnostic services to general practitioners and specialist physicians, for the investigation of patients with abnormal cardiac rhythm and function. The service uses unique transtelephonic (by telephone) cardiac recorders that monitor and provide diagnostic information to physicians and their patients.
